

Enable Multi Agent integrations with Now Assist AI Agents and A2A

Safe harbor notice for forward-looking statements

This presentation may contain “forward-looking” statements that are based on our beliefs and assumptions and on information currently available to us only as of the date of this presentation. Forward-looking statements involve known and unknown risks, uncertainties, and other factors that may cause actual results to differ materially from those expected or implied by the forward-looking statements. Further information on these and other factors that could cause or contribute to such differences include, but are not limited to, those discussed in the section titled “Risk Factors,” set forth in our most recent Annual Report on Form 10-K and Quarterly Report on Form 10-Q and in our other Securities and Exchange Commission filings. We cannot guarantee that we will achieve

the plans, intentions, or expectations disclosed in our forward-looking statements, and you should not place undue reliance on our forward-looking statements.

The information on new products, features, or functionality is intended to outline our general product direction and should not be relied upon in making a purchasing decision, is for informational purposes only, and shall not be incorporated into any contract, and is not a commitment, promise, or legal obligation to deliver any material, code, or functionality.

The development, release, and timing of any features or functionality described for our products remains at our sole discretion. We undertake no obligation, and do not intend, to update the forward-looking statements.

AI Agent Interoperability

Connect third-party AI agents and tools to enhance agentic workflow orchestration – learn more about *Action Fabric*

Achieve enterprise-grade Agentic Interoperability
 Unite siloed AI agents into a cohesive digital workforce, leveraging multi-agent frameworks Agent2Agent for complex use cases.

Streamline development in AI Agent Studio
 Access a wide array of internal and external AI agents, tools, and resources to build flexible, powerful agentic workflows tailored to your business needs.

When to use Virtual Agent API, MCP, and A2A

Virtual Agent API

What is it?: REST API framework developed by ServiceNow for chatbot integration

Use for: Connecting ServiceNow Virtual Agent with another bot interface

MCP (Model Context Protocol)

What is it?: Open standard by Anthropic for connecting AI applications (agents) to external systems.

Use for: Connecting Now Assist AI Agents to external or Now Assist tools

A2A (Agent2Agent)

What is it?: Open standard by Google that enables AI agents from different systems to communicate and collaborate.

Use for: Connecting Now Assist AI Agents with external AI Agents
